Description:

MediPal is an intuitive mobile application made to assist people in effectively managing their prescription drugs, medical records, and doctor's appointments. It is used as a personal health companion, tracking vital signs, storing digital prescriptions, securely organizing medical records, and sending timely medication reminders. It lowers missed doses, protects against health issues, and simplifies the monitoring of medical records for older users, chronic patients, working professionals, and caregivers. Vitals tracking, appointment scheduling, medication alarms, emergency access, and health record storage are some of the main features. Smartwatch connection, multi-user support, and dark mode are optional add-ons that make health management easy, dependable, and available to everyone.
